Question 1. (Multi Select)

As an HR Manager, you are asked to sign up a manager's employees to a Learning offering in a way that the employee can decide whether they want to take the training or not. This should impact only the manager's current employees, not employees joining the team in the future. Which two methods can you use to meet this requirement?

A: Go to the Learning Catalog page. On the Course tab, find and select the course. In the Offerings tile, find and select the relevant offering. In the Learners tile, select the Learning Assignments tab and click Add Learners - Recommend. From there, sign up the relevant employees.

B: Go to the Learning Catalog page. On the Offering tab, select the offering. In the Learners tile, select the Learning Assignments tab and click Add Learners - Recommend. From there, sign up the relevant employees.

C: Go to the Learning Catalog page. On the Course tab, find and select the course. In the Offerings tile, find and select the relevant offering. In the Learners tile, select the Learning Initiatives tab and click Add Learners - Voluntary. From there, sign up the relevant employees.

D: Go to the Learning Catalog page. On the Offering tab, select the offering. In the Learners tile, select the Learning Assignments tab and click Add Learners - Voluntary. From there, sign up the relevant employees.

E: Go to the Learning Catalog page. On the Course tab, find and select the course. In the Offerings tile, find and select the relevant offering. In the Learners tile, select the Learning Assignments tab and click Add Learners - Voluntary. From there, sign up the relevant employees.

Answer: A, B

Question 2. (Single Select)

A customer indicates that, in most cases, learners who have previously completed a course are exempted from repeating it when it is assigned to their group. The administrators do not want to have to specify this behavior for each course that they assign. How do you achieve this while configuring the learning catalog?

A: Create a new version of the course to assign only to learners without completions against the existing course.

B: Change the setting for this by using the Configure Catalog Defaults task.

C: Develop a script that removes learners with completions from the assignment group.

D: Allow the system to require the learning for everyone and apply a filter on the OTBI Completions report to exclude those with previous completions.

Answer: B

Question 3. (Multi Select)

You're working through a catalog implementation strategy to determine who has access to which learning. What are two characteristics of ad hoc access groups and named access groups?

A: Ad hoc access groups define access for Learning Administrators. Named access groups define access for a group of named learners.

B: Ad hoc access groups have a lower priority than named access groups.

C: Ad hoc access groups define access for a group of learners, e.g.. a manager's direct re-ports. Named access groups define access only for a group of named learners.

D: Ad hoc access groups are defined once. Named access groups are evaluated on an ongoing basis, e.g once a day. Mark for Reviews

Answer: B, D

Question 4. (Single Select)

You have been asked to create an assignment to an offering with E-learning content in such a way that the learners will always see the newest version of the content. You initiate an assignment for the right offering and group of learners. What is the next step you must perform on the Advanced Rules pop-up page?

A: Set Learning Item As-of Date to Assignment to Learner Date.

B: Leave Learning Item As-of Date blank.

C: Set Learning Item As-of Date to Latest.

D: Set Learning Item As-of Date to Assignment to Initiative Start Date.

Answer: C

Question 5. (Single Select)

As a Learning Administrator, you want to take advantage of the Learning application's ability to use AI to automatically suggest Learning Outcomes that can be attached to your courses and specializations. Which feature must you enable?

- A: Advanced Outcomes
- B: Skills Advisor
- C: Competency Analysis
- D: Activity Sequencing

Answer: B
